If you're ready to submit your project, just [fill out the form](#) and you're all set.

Product Spotlight: Sequentia FRP

Sequentia is a line by Crane Composites, which has been in business since 1954 and is a leading provider of FRP. Sequentia panels are available in two types: flat or corrugated.

Flat panels are traditional wall and ceiling panels that are easy to clean, durable, and available in a Class A or Class C fire rating. They are sold in 4'x8', 4'x10' or 4'x12' sizes and are ideal for surfaces that require sanitation and ease in cleaning.

Corrugated panels are translucent panels with UV protection that can be used for residential or commercial jobs. They are 26" wide and 8', 10' or 12' in length and are ideal for outdoor use on patios, carports, pool enclosures and related structures. They are guaranteed for 10 or 20 years depending on the type purchased.

Ohio Valley Drywall Supply is a distributor of Sequentia products. [Contact us to get your order started today!](#)

Making the Move to Safety Helmets

Despite so many advances in building materials and construction practices, the design of hard hats hasn't changed in 40 years. This is problematic because the hats are held in place by bands and can come off during a fall.

Falls are responsible for 38.7% of deaths in construction accidents according to OSHA, making them the leading cause of worker deaths.

It might be worth considering a switch to safety helmets from a brand like KASK to help improve safety outcomes on the jobsite. Helmets offer such improvements as chin straps, size adjustment systems and visors. Pilot programs in the industry have, so far, produced a lot of positive feedback.

In fact, Ohio Valley Drywall Supply recently supplied safety helmets to Dick Building Co. [Read more](#) about their experience with safety helmets, or [contact us](#) to learn about the different types of safety helmets available for purchase.

Project Spotlight: Eighth and Penn

The new Eighth and Penn development in Pittsburgh, PA includes 136 high-end apartments plus restaurant and retail space. The groundbreaking was held on July 17 of last year, and includes the restoration of two historic buildings (the McNally Building and the Bonn Building).

Construction is expected to be completed by June of 2019. Ohio Valley Drywall Supply has been providing a number of products for the project.

General Contractor: Mistick Construction

Exterior Contractor: Easley & Rivers

Interior Contractor: GMC Drywall
