### GridMarX® Saves Up to \$70 Per Thousand Square Feet!

If you're looking to save time and money during the later stages of your project, National Gypsum's Gold Bond® BRAND GridMarX® Gypsum Board may be the ticket.

This innovative product has installation guide marks printed directly on the board, which helps installers:

- Space fasteners more efficiently
- Locate studs quickly
- Make accurate cuts without drawing lines
- Reduce the learning curve for new laborers
- Save time and money on installation costs

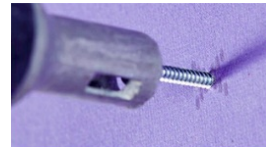

The boards can be installed **vertically** (the markings serve as guide marks) or **horizontally** (the markings serve as reference marks). For **ceiling** applications, the markings provide a reference for locating joists.

According to the manufacturer, "Guide marks run along the board lengthwise every 4 inches, in both tapers and at 16 in., 24 in. and 32 in. o.c. The GridMarX are visible even in the low light conditions of the typical jobsite, yet cover easily with no bleed-through using standard paint products."

Take a look at the two videos here to learn more:

### We're Expanding!

Great news! We've expanded our Washington (Meadowlands), PA location with the addition of a new 10,000 square foot drywall warehouse. This building allows us to better service our commercial and residential customers by offering a full inventory of in-stock products for all types of jobs.

We are also renovating our showroom so that it can accommodate a larger range of items for our customers. It is scheduled to be finished by the end of the year.

Make sure to stop by and take a look!

### Product Spotlight: ClarkDietrich's Pony Wall Connector

Recently launched, Pony Wall is a new partial wall framing connection that is part of ClarkDietrich's Clip Express line.

This product was designed to support out-of-plane loading for cantilevered partial wall systems that are unsupported at the top track. You simply install and anchor it inside the track or directly to the floor, and then attach the studs.

Dimensions available:

- PW24 = 23-3/4" tall with 3-3/8" wide x 8" long plate
- PW36 = 35-3/4" tall with 3-3/8" wide x 8" long plate
- PW48 = 47-3/4" tall with 3-3/8" wide x 8" long plate

## Project Spotlight: TRYP Hotel in Lawrenceville

The 108-room TRYP Hotel in Lawrenceville is being constructed in the historic Washington Education Center building, which closed in 2006. The space is 90,000 square feet in size and had previously been targeted for demolition by developers. It will be the first TRYP hotel in the state (there are only six others in the United States) and will preserve the existing streetscape for residents and community groups.

Each of these hotels has a unique design that reflects the character of its city. This one will offer a different theme on each floor, including metal, masonry, wood, print/draft and trade school. It will also feature 100 parking spaces, a rooftop area with views of the downtown skyline, and two restaurants. It is scheduled to open in early 2019.

Ohio Valley Drywall Supply is supplying the drywall and metal framing for the project.

**General Contractor:** Franjo  
**Interior Subcontractor:** Irwin Interiors Systems  
**Drywall:** National Gypsum  
**Steel Studs:** ClarkDietrich
